Laboratory tests showed that starch gelatinized in
water (in a hot state) is retained by cellulose fibres in
quantities not exceeding 3% and almost irrespectively
from the amount of starch added based on the weight of
the fibres. Starch prepared by this method should not
be added into the hollander in quantities greater than
5% by weight. Most suitable is the addition of starch
(Materials--Paper, TT, v. 7, no. 8) (over)
